no matter how improbable, must be the Truth. (Sherlock Holmes)

Neil & I, ruminating in the Ivory Tower at 36½ Union St, ran smack-dab into a wall we've avoided too long: a classmate, Larry Bogart, the power and the throne, of and behind.....

CITIZEN's ENERGY COUNCIL

box 285 Allendale NJ 07401

He insists on ridding the world not only of nuclear weapons but also of nuclear power in any form. Chernobyl precipitated helping him spread the word ... any of you who can ignore radiation can continue to ignore Larry.. we cannot...

that is why page 3 is not assassinology (welcome respite) Our suggestion, because Sweden has decided to rid itself of all nuclear anything, we, the US, should create a new race: Beat Sweden to the punch and do it before she does in 2001. We're so damn smart....

LAST-CHANCE WEEKLY
BULLETIN

21 June · 9 to 4 · 777 UN Plaza NY City - Open Forum on ENDING Nuclear Power/Weapons ... if you can't come send your ideas to CEC

As severe as the Chernobyl accident was, it was far from a "worst case," as the NRC uses that term. The proponents and opponents of nuclear power will be discussing the details for years.

But what is important now is that a considerable percentage of the American public wants an end to nuclear power; M. Gorbachev says USSR will keep on with its nuclear expansion. In the mistaken belief that Congress is the agency to effect change, many nuclear opponents will seek reform and suspension of licenses for a score of plants that are nearing completion. CEC does not believe these efforts will be productive, because Congress and the agencies have been "acquired" by the nuclear industry, and they are not about to yield to the facts.

THE MOST PROMISING APPROACH

seems to be that adopted by Maine and Oregon, namely, to put a proposition on the ballot in the fall election which would require the state government to shut down the plant until such time as the DoE has a functioning waste repository. Information about Initiative and Referendum, which is a tool that can be used by political subdivisions, is available from The Initiative Resource Center, PO BOX 65023, Washington, DC 20035.

NRC DERELICTION

In a full-page ad in the New YorkTimes May 19, PUBLIC CITIZEN quotes former Union of Concerned Scientists executive director Daniel Ford and Robert Pollard ("Indian Point is an accident waiting to happen"). They accuse the NRC, with supporting documents, of failing to do anything about the badly-designed containment of GE Boiling Water Reactors -- not any better than Chernobyl's -- which has been a matter of record since 1972. It seems to make sense for the public to concentrate on phasing out a number of reactor complexes because of the obvious danger of having more than one reactor at a site. Also, the NRC knows -- and the record illustrates -- Babcock and Wilcox reactors, like TMI and Davis-Besse, should have their operating licenses lifted. Also, those GE reactors in densely populated areas -- Limerick, PA; Perry, OH; Fermi near Detroit, MI; should be suspended. Those reactors that have not yet been permitted low-power testing should never be fired up, because it will add at least $150 million to the cost of eventually dismantling the structures. Some of these might be converted to natural gas in order to salvage some of the investment. It appears, however, from a survey by PUBLIC CITIZEN on Least-Cost Energy that it would be cheaper in the long run for consumers if no further nuclear power plants were licensed.

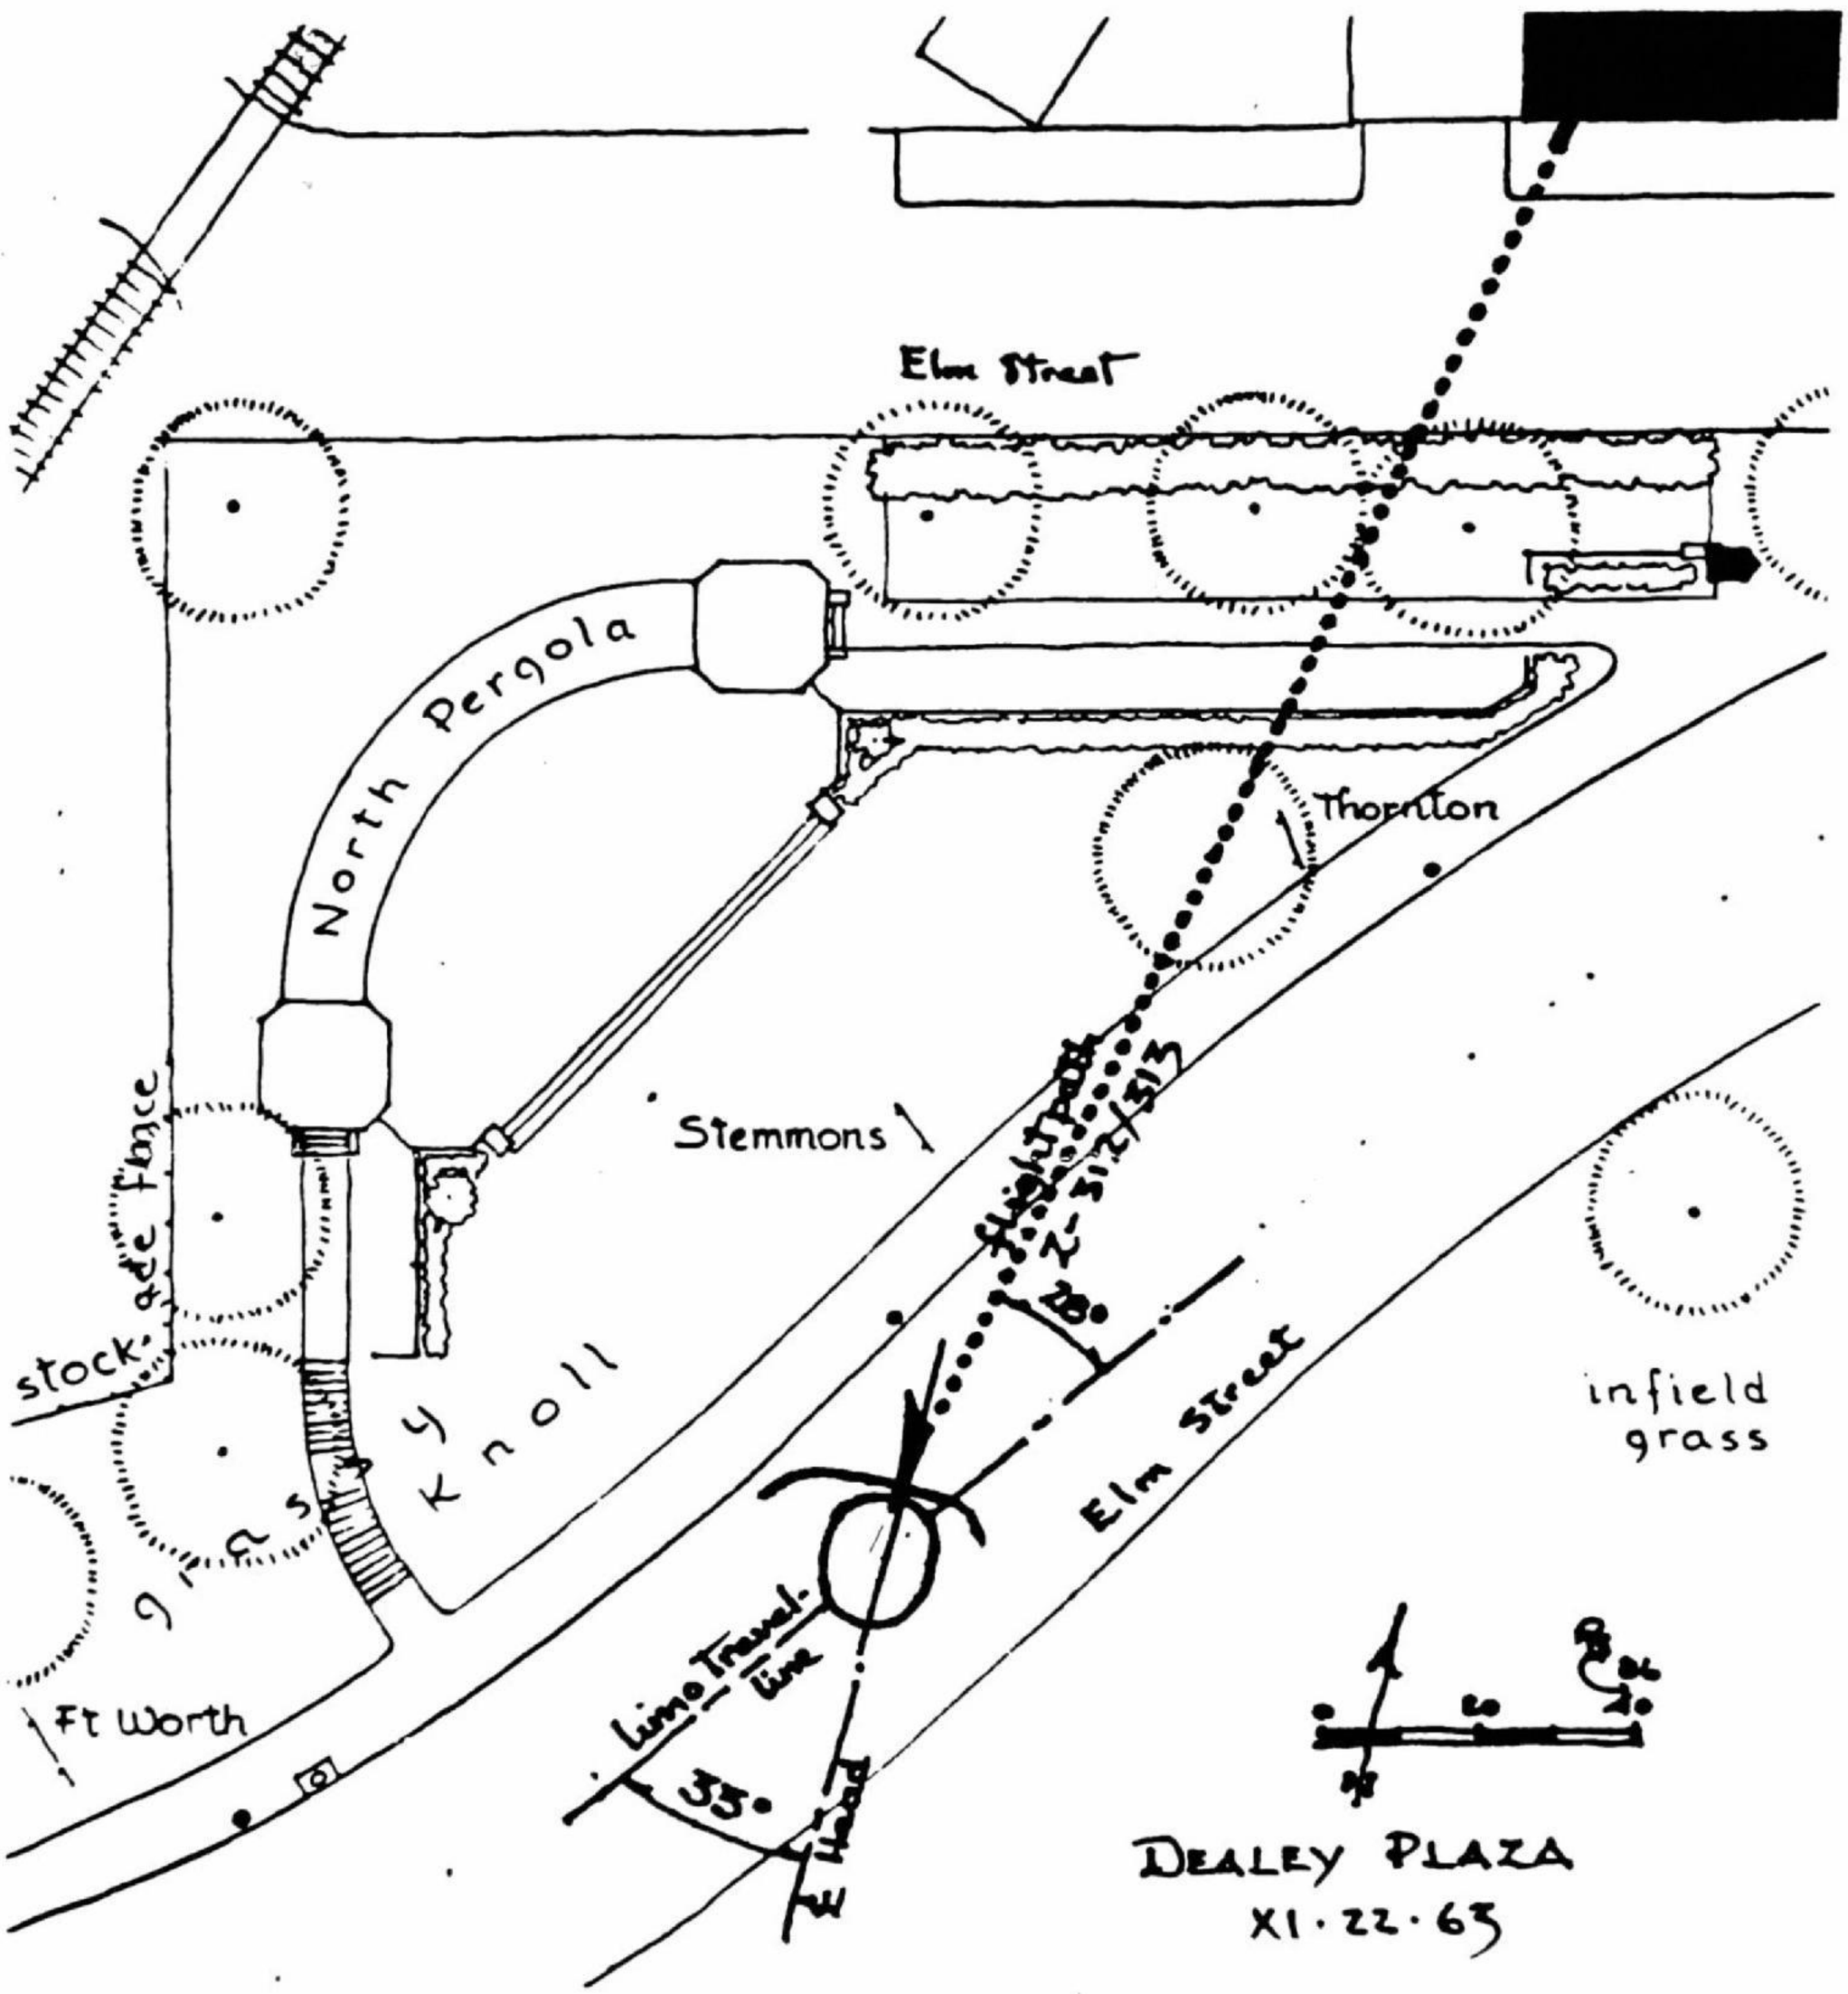
HEAD SHOT · JFK

[one more "shot" at the 2nd Head Shot Syndrome]



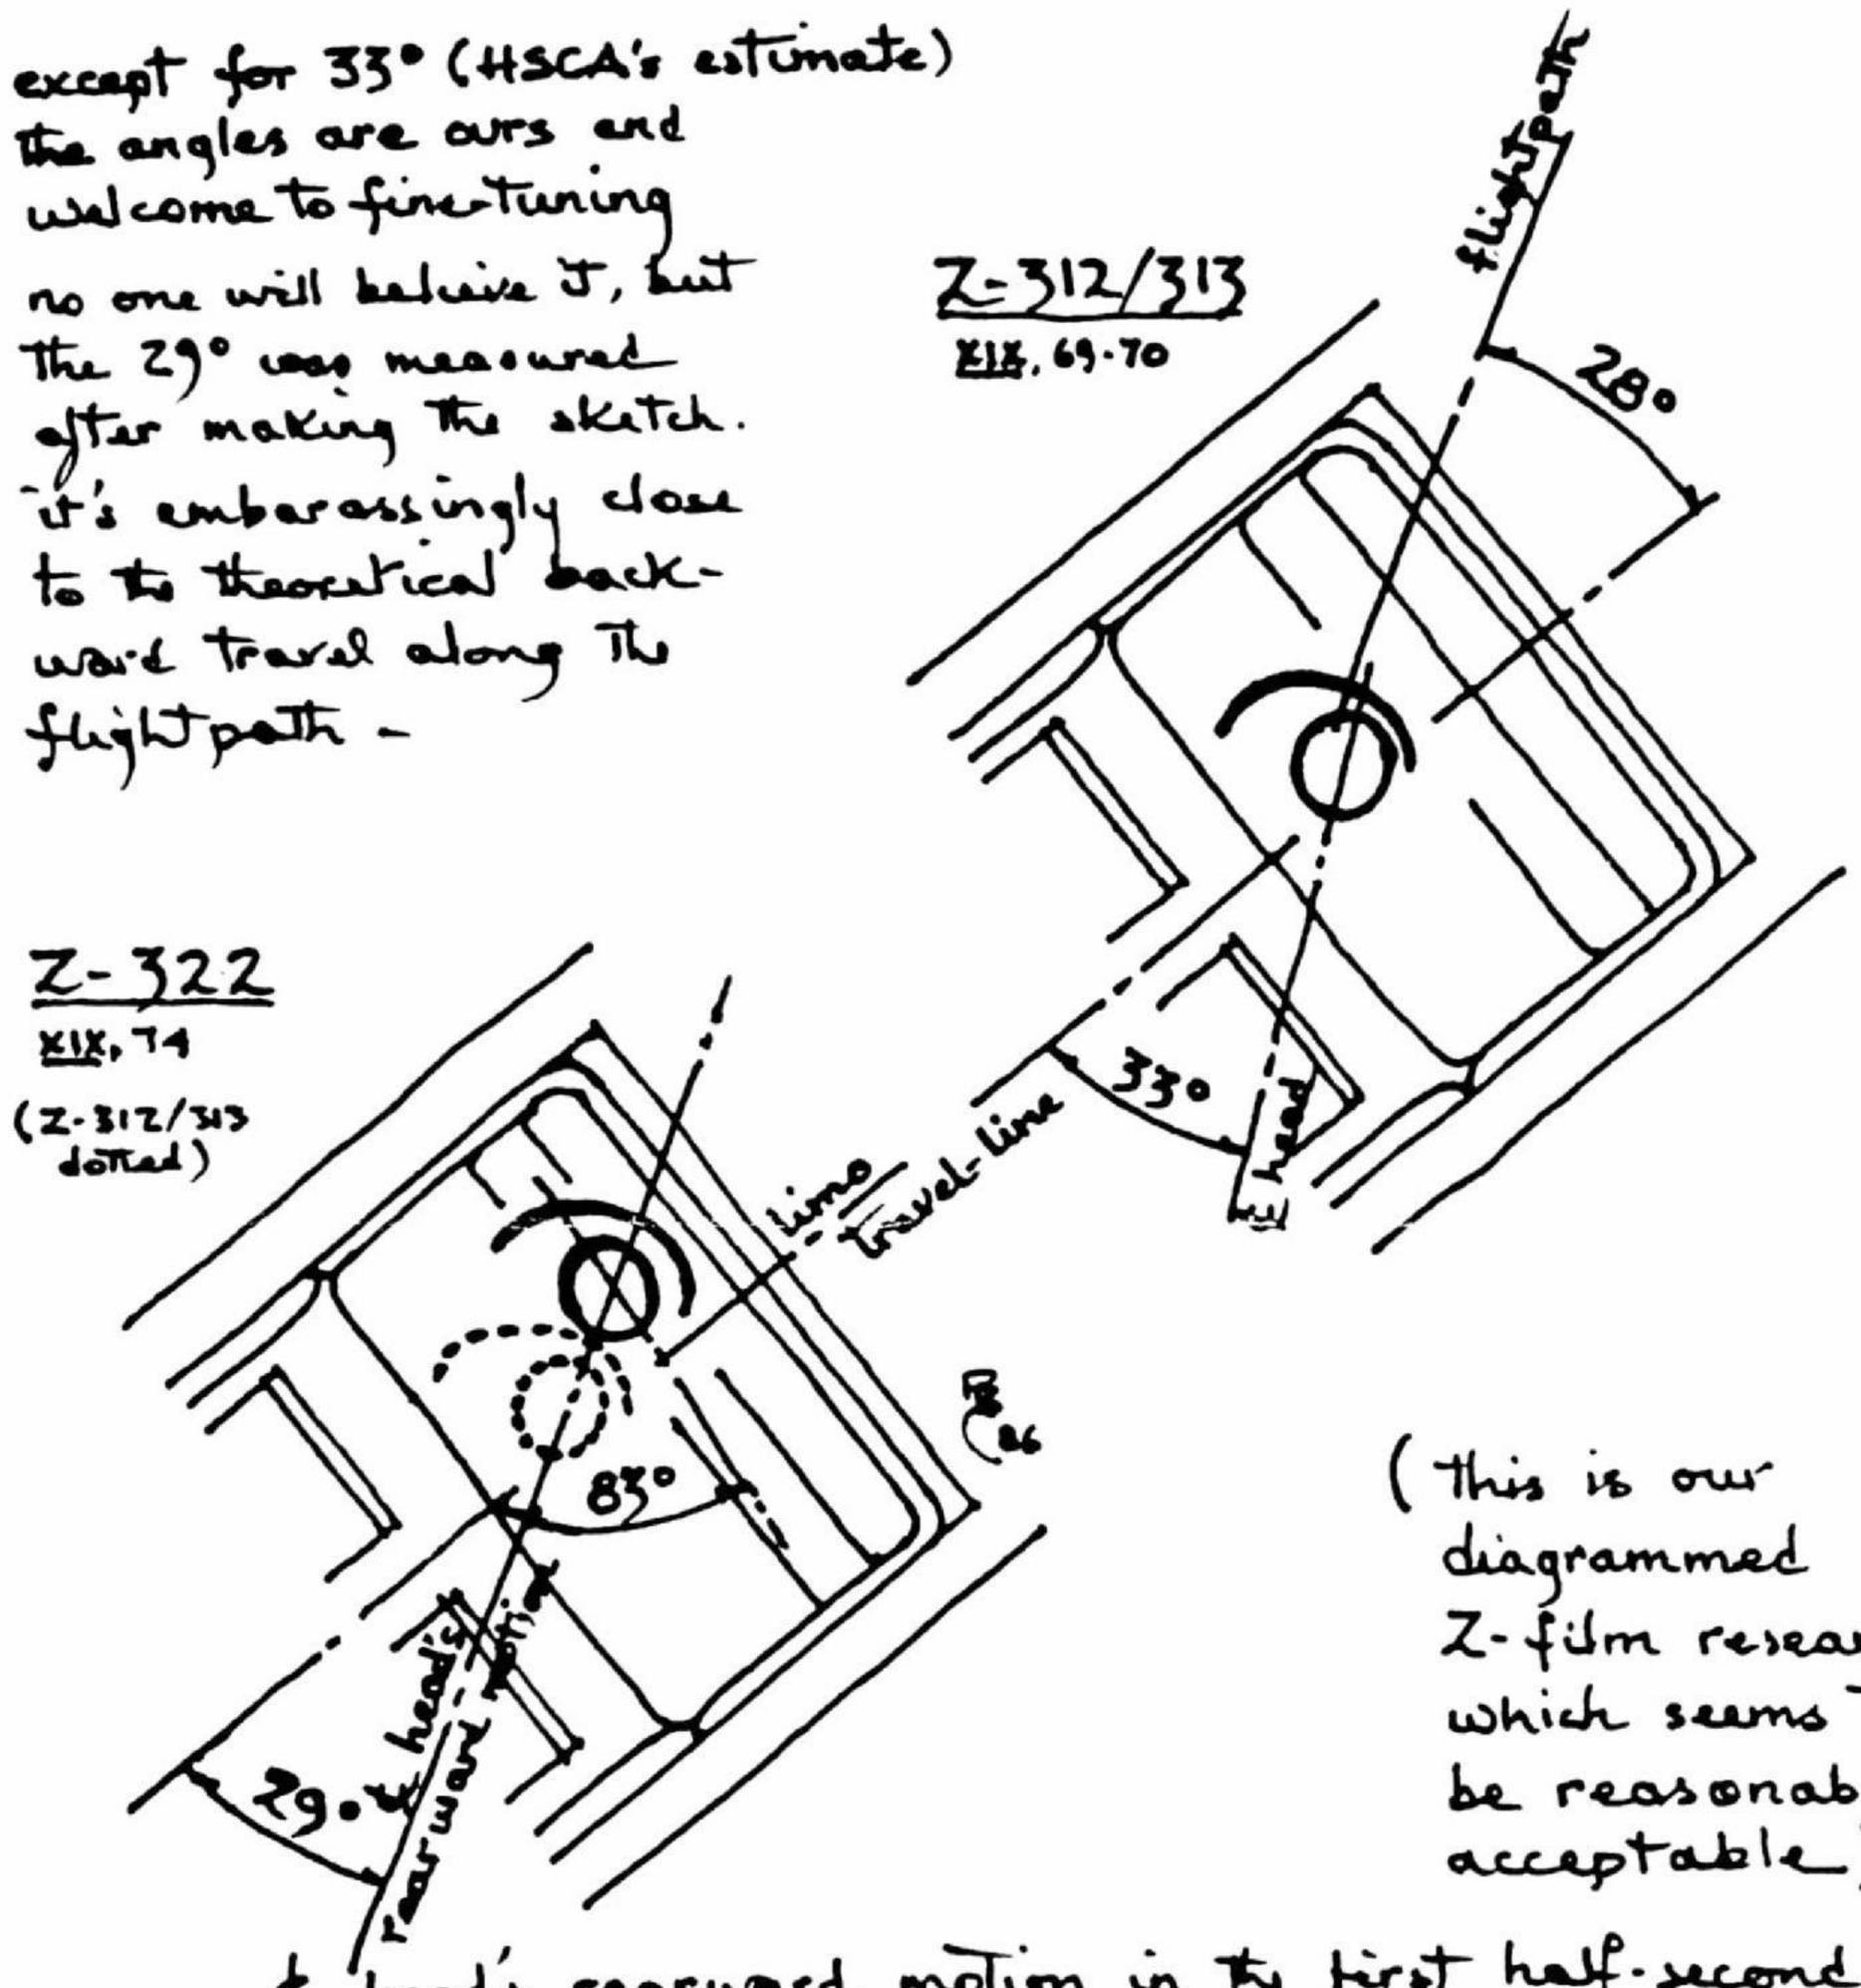
DEALEY PLAZA
X1 · 22 · 63

- a bullet fired from TSBD's window VI #14 traverses the head, slightly inclined and at 33° to the limo's travel-line.

continued

HEAD SHOT · JFK

except for 33° (HSCA's estimate) the angles are ours and welcome to fine-tuning no one will believe it, but the 29° was measured after making the sketch. it's embarassingly close to the theoretical back-ward travel along the flight path -



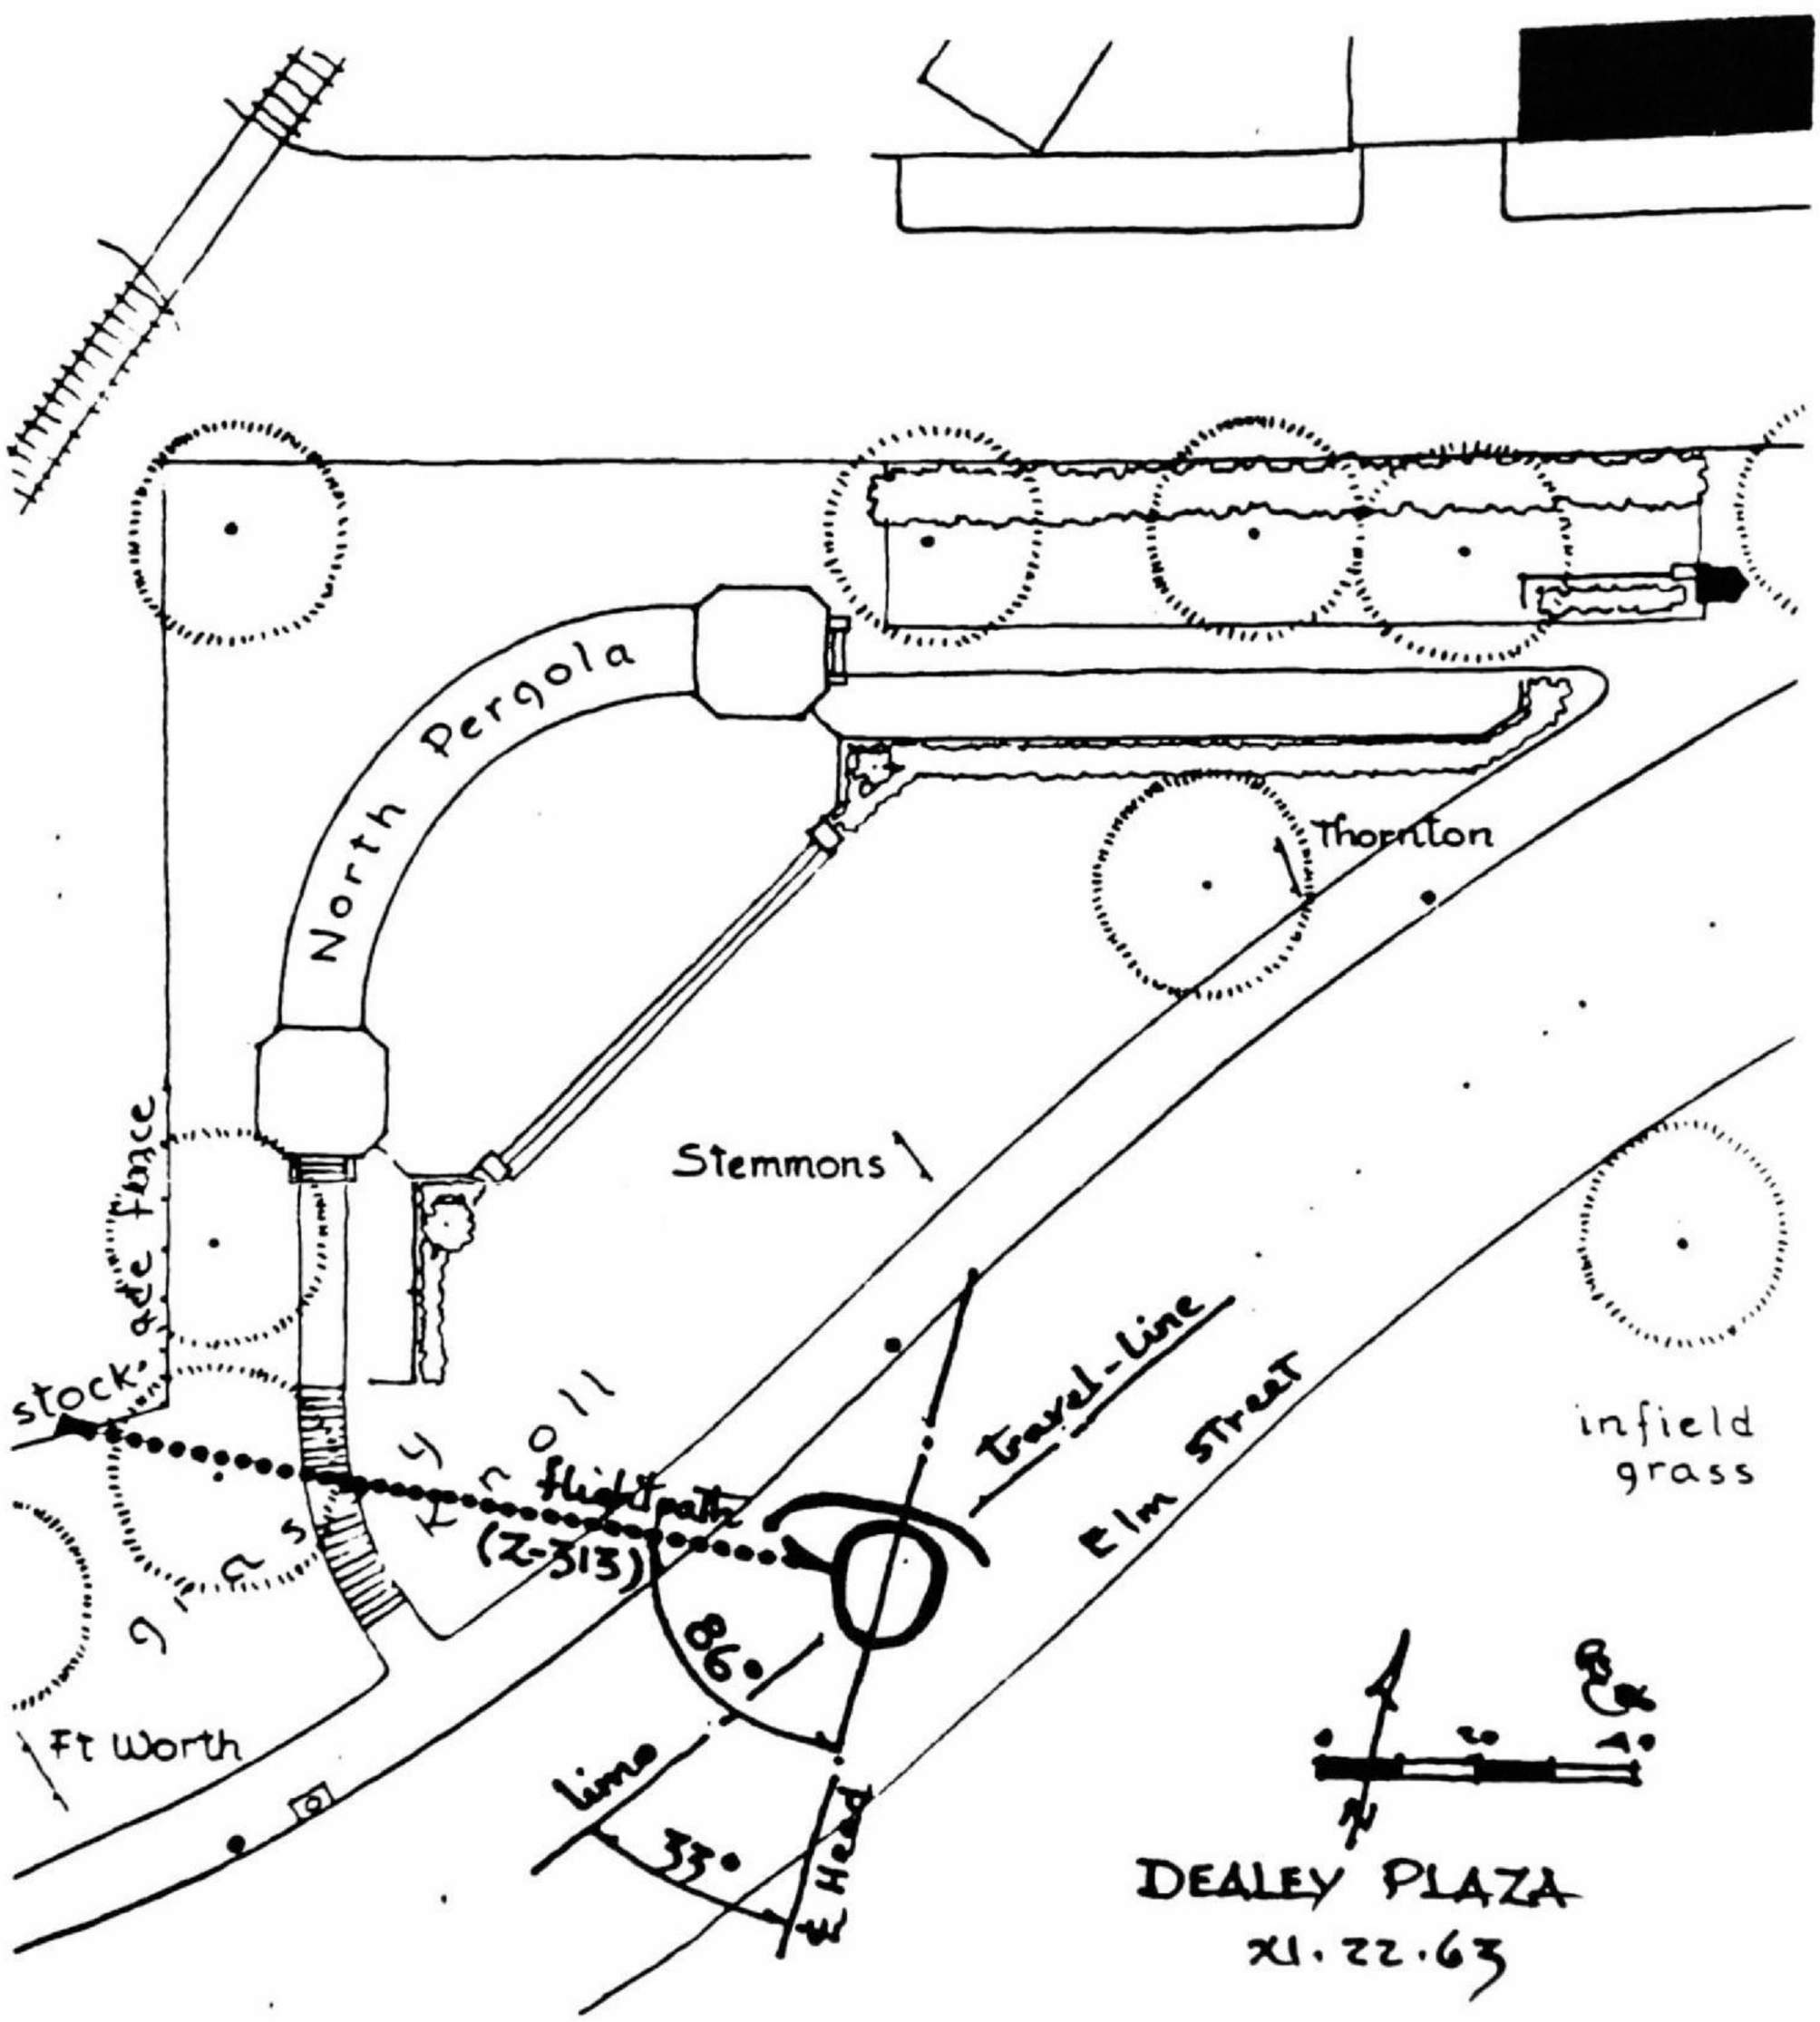
(this is our diagrammed Z-film research which seems to be reasonably acceptable)

& head's rearward motion in the first half-second after the bullet hit tangentially and 1" off-center, to the right: the photo evidence clearly shows the back of the President's head in Z-322 turned almost at right angles to the limo's travel-line. This is the end of that motion; he bounces forward off the seat cushion.

None of this fits a second shot to the head from anywhere.

continued

2nd HEAD SHOT · JFK



a bullet fired from about 12' from the corner of the stockade fence is postulated as the cause of the head's rearward motion after both the shot from TSBD and this bullet from the grassy knoll have quit the scene.... impossible.

ps. in VIII.83 we had 85°...

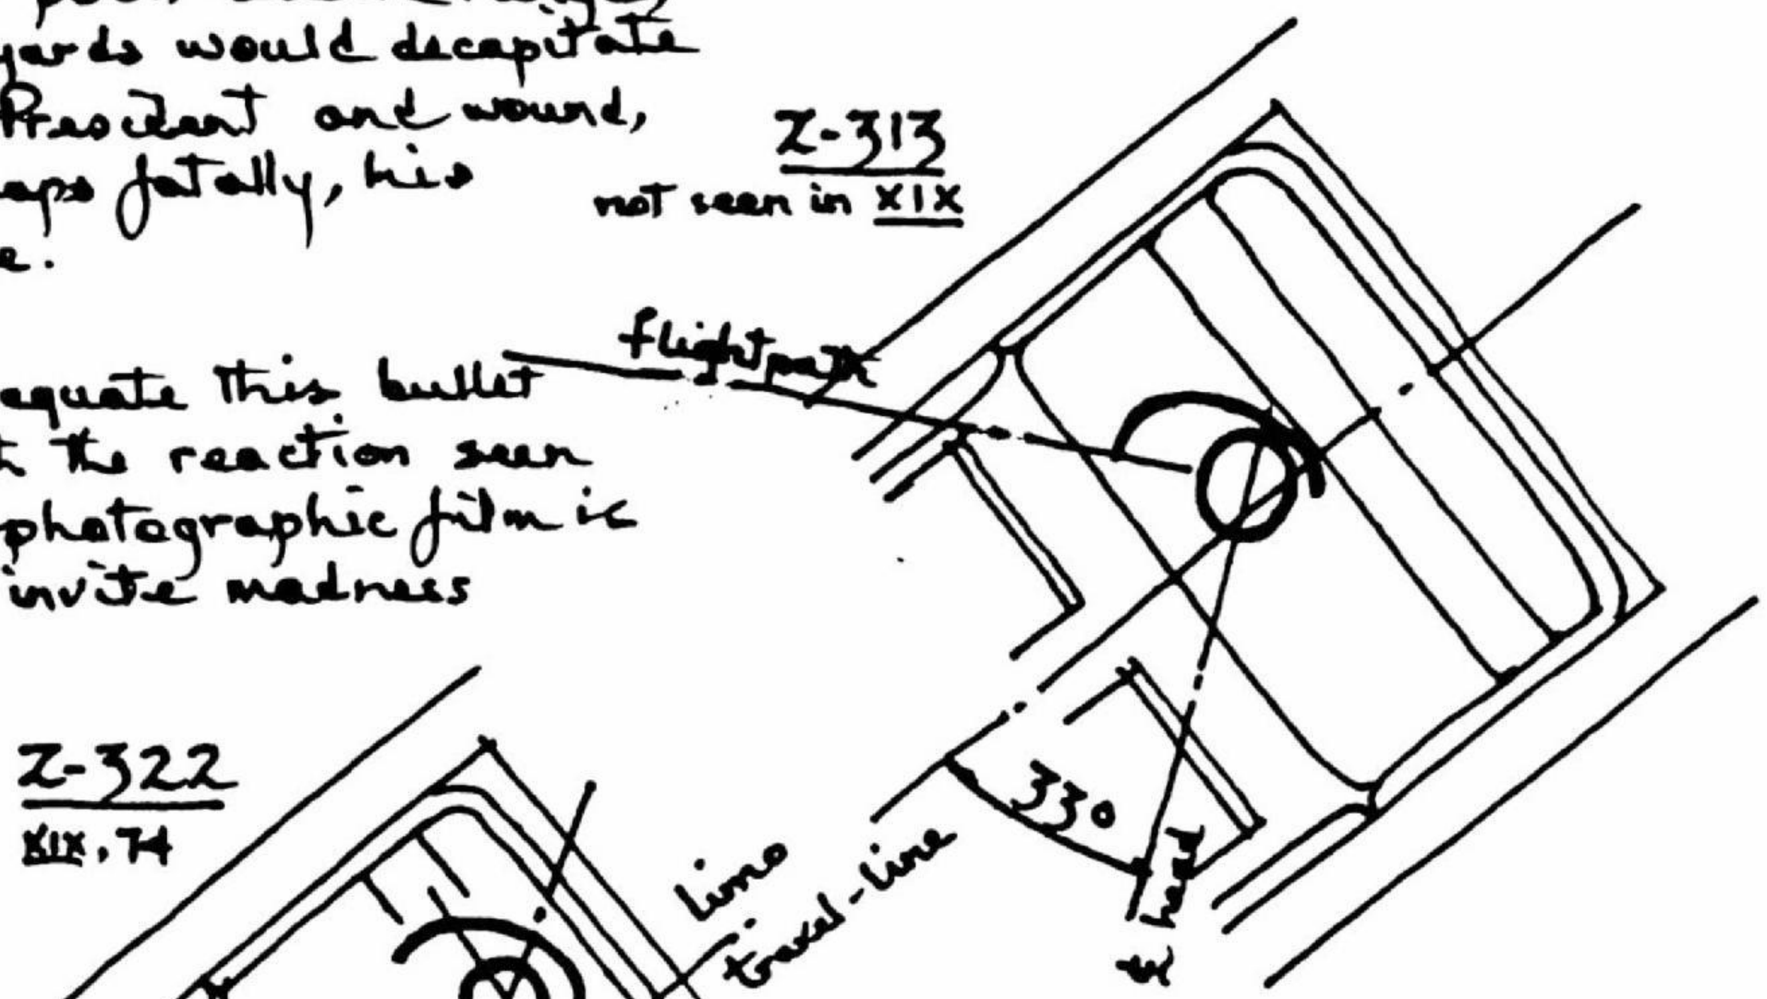
continued

GKG.6.VI.86

2nd HEAD SHOT · JFK

this point-blank range, 35 yards would decapitate the President and wound, perhaps fatally, his wife.

to equate this bullet with the reaction seen on photographic film is to invite madness



Having perceived madness in many critics, friends, et al and now appearing in third decade publications, FREEDOM, May 1986, it seemed pertinent to save the next generation .... if it's not too late

Study these two interpretations of the photographic evidence, with which everyone is enraptured, except when it goes against a "gut feeling" for the head's rearward motion.... gut feelings have got to go..... Research has marched along since '66 and found the third law of motion ... equal and opposite reaction .... to handle the physical evidence. No harm in joining that bandwagon: Galileo, Newton and you. This does NOT mean no shot was fired from the Grassy Knoll - it does mean the shot that was fired from there did NOT WOUND anyone, in or out of the limousine. ▼

RESEARCH PUBLICATIONS & Dr Grofman, CEC

GKG 81-85

You decide you'd like to have five years of assassinological info available in one spiral-bound, 8 1/2 x 11, paperback ...a helpful, handy reference, indexed for ten subjects and eleven books reviewed, providing answers to queries on Mary Jo, Novel, Santana, Seymour, Thane Eugene Cesar, Tikhomirov, US death squads, AJ Hidell (alias O still selling at $15 ppd) WHO, Hinckley's fellow-conspirator, the Bushyknoll Assassin, Jacqueline Croft's friend Maurice and a few others .... ($10 to GKG-ers)

Our estimate for this book GKG 81-85 threw a few into a tizzie when it came in 25% higher ... the price is $15.00 ppd ... and for those who instruct others in this miasma we can be influenced into working up an educational discount.... it's not all bad; we find it handy indeed as memory fades ...

J W Burke jr has sent us what must be a rare volume in any league:

GKG Special : The Umbrella Man , his XII/79 issue... this is the advance excerpting of The Day of the Umbrella Man .. unable to price this we suggest you send us a dollar for postage and whatever you feel is right for Bill, direct to him after receipt

Unable to realize early retirement on the Special, he is offering to photocopy a complete set of JOACHIM JOESTEN's TRUTH LETTER, a real rara avis indeed, for ...and here we leave you to negotiate for yourself: P O Box 5098 Richmond VA 23220

EXPLO 007

as this issue goes to press, our anti-Rambo effort goes 35 more miles to another printer ... GKG partners' second offering, it will be the expanded and updated (with GKG excerpts) second printing of The Flight of KA 007

hoping to revive the spirit of HR 370 which sought to impeach Reagan for usurping Congress' war powers over Grenada, this ties him to the high crime of exploding KA 007 over the Pacific and blaming the Russians for it ... GKG subscribers' date is 1Sept .. the price ??

"Nuclear power is lock, stock and barrel a creation of the government. And to blame the free market for any of the horror or defects of nuclear power is *absurd*. That's the joke of the century. Nuclear power and the whole utility industry is a government-privileged monopoly!" CEC's John Gofman, MD PhD
